! about me

I'm a graphic designer from Yemen. In Yemen I worked with a Senior Graphic designer on a daily basis and learned a lot from him, here is where I decided to further my education in this field and with that decision came the option of moving to the United States. Upon arrival I enrolled myself into Queensboro College and majored in Graphic Design. I achieved my Associates Degree and has since been continuing my education studying for my Bachelors Degree in Digital design at Queens College. I am eager and ready to get a full time job in this field so i can continue to learn and expand my knowledge, use my creativity, apply my skills and talent, and be a benefit to any company.

skills

hobbies

Photography • Watching Movies • Listening to classic movies
